Hi,

I sent this message @ 1:07 PM and haven't seen it posted yet. It's now 5:36 PM so I am sending it again.

I have exhausted all my know how on the three that didn't copy all the files and really don't know what else I can do?

On Fri, 22 Sep 2006 21:25:40 +1000, "Pegasus \ (MVP)" <I.can@xxxxxxx> wrote:

You have to post the batch file you currently use if you require any further comments.

See below.

You should also check the meaning of the /d switch. It is most likely the reason why some files do not get copied on your second attempt.

This shouldn't apply this time since all the folders are empty.

If you still believe that a single file failed to get copied then you should post its full name and location.

These files are posted below with my Test bat file executing them.

Hi Pegasus,

Sorry, I guess I don't know enough about this. Although some files were copied none of the destination folders had the correct amount of files or the size in them except Agent on the third try. See below.

..

After a lot of thinking I did get one right but don't know about the other three folders. I am stumped.

Here are the results:

c: test had 3328 files, 293 folders, 1.09 GB

j: test had 3328, 283 1.09 10 less folders

Re: How can I get all folders to show date modified?

Re: How can I get all folders to show date modified?

c: agent 192, 5 480 mb
j: test agent empty
SECOND try with out the extra \

```
xcopy /s /y /d /h "C:\Program Files\Agent" "J:\test Agent"
```

j: test agent 194 5 481 mb

c:favorites 160 9 54.5 kb
j test favorites 160 9 648 kb 593.5 kb more

c:cookies 120 0 115 kb
j:test cookies 120 0 556 kb 441 kb more

You should also check the meaning of the /d switch. It is most likely the reason why some files do not get copied on your second attempt.

That makes sense but It can't be that cause all these files should have been updated. The test folders on J: were empty so they all should have been copied.

If you still believe that a single file failed to get copied then you should post its full name and location.

According to my J:folder all the folders had some copied files in them except Agent which was empty but the script said only 120 files were copied.

The second time I ran it the program seem to work except for the agent folder. There is still files missing that didn't get copied the first or second time.

Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985–2001 Microsoft Corp.

```
C:\Documents and Settings\HP_Administrator>test  
0 File(s) copied  
0 File(s) copied  
0 File(s) copied  
Invalid path  
0 File(s) copied
```

this is the path from Explorer:
C:\Program Files\Agent
this is the path from my batch file:
C:\Program Files\Agent\

So I tried it again with out the extra \ and it worked.the extra files are because I received emails.

Re: How can I get all folders to show date modified?

Re: How can I get all folders to show date modified?

You have to post the batch file you currently use if you require any further comments.

I posted this bat file:

```
@echo off
xcopy /s /y /d /h "C:\test" "J:\test"
xcopy /s /y /d /h "C:\Cookies" "J:\test cookies"
xcopy /s /y /d /h "C:\favorites" "J:\test favorites"
xcopy /s /y /d /h "C:\Program Files\Agent\" "J:\test Agent"
```

Here's what I got the first time I ran it:

```
