Hi

thanks for the link BUT it couldn't delete it – Access is denied – error

Good program to have in the box anyway – any ideas appreciated...

John

I know it sounds wierd but I was installing some software that collapsed on me and I can't re-install as the installation program can't open the folder xxxxxx. I am a single user, no sharing, no admin and I am LOST as to how to delete it! Any help will be greatly appreciated – I'm not a newbie but feel like one at the moment – Thanks in anticipation – John

Use this program to delete it: (delete on boot)

<http://www.snapfiles.com/get/moveonboot.html>

(this program can delete anything regardless of what windows wants
