Hi,

To the System Restore question:

For internal drives/partitions.

How to disable a monitored drive:

<http://bertk.mvps.org/html/drivedisable.html>

For external drives.

Tips Fixes & FAQs – Should I let System Restore monitor my external hard drive?

<http://bertk.mvps.org/html/tips.html>

"Demon" wrote

kind of a double header of questions here.

1. Is there any way to split the quick launch bar from the main taskbar completely as I want all the games I've got installed not to be taking up space on the desktop.
2. Can system restore be set NOT to use a external (or a slave) hard drive to store to as I'm currently using that drive for game/pictures/documents/installers that I've downloaded and I don't want the space to be wasted when there is plenty of space on the main hard drive
