Hi,

Click start/run, or type winkey+r to open a run dialog. Type CMD and click ok. From the prompt, run chknfs /d to clear the dirty bit.

when trying to run defreg on c drive i get a message saying that Chkdsk is scheduled to run on the drive, BUT no schedule is set for defrag (in scheduled tasks), but i can defrag the other drive (F) with no problems.

how do i turn off the schedule run???
