thanks for your reply , sure do appreciate it. not going to disable telephony  
i am just trying to disable what i dont need it was taking my computer over five min.  
to shut down after i have disable 11 services it shuts down in less then 1 min.  
dont know if disabling the services done it or something else.  
thanks again

hello

RE: telephony

some tech sites says to disable telephony service and some  
say do not  
disable ,  
whats the facts? i got window home sp2  
thanks much

Hi Larry,  
Some say for a security issue, it could be exploited by melcious attackers  
and some say for Performance issue.  
The more you have runing Processors/Services in the background the more  
the  
Performance is decreases, to disable this service you can open the Run  
command and type in :  
services.msc click [OK] and there see what service you don't need to run.  
Read this article there are lots of answers:  
[http://www.jasonn.com/turning\\_off\\_unnecessary\\_services\\_on\\_windows\\_xp](http://www.jasonn.com/turning_off_unnecessary_services_on_windows_xp)
