I was was trying to copy a data folder, about 80MB, to a DVD+RW which I thought would be a straight forward copy/paste operation with Explorer or in My Computer. I have copied data to CD-R with this drive and also copied DVD video with Nero Essentials 6 which came with the drive.

The error says:
'Windows encountered a problem copying this folder.'
'What do you want to do?'
retry skip cancel

Nero Express 'disk info' shows:
DVD+RW 4,483 MB
disk is empty
However, it says it will only write to CD-R/RW

The same data folder then copied to a CD-R without a hitch.
This is the first time I have tried to write data to a DVD.
What do I have to do to get this to work??
:-S
Thanks
Mike

Pioneer DVR-111D (slave) (box verifies write to DVD-R/RW DVD+R/RW)
TSSTcorp CD/DVDW TS-H552B Toshiba/Samsung (master)(OEM)
Windows XP Home SP2
eMachines T3418
Sempron 3400+ 2.0 Ghz
1024 MB RAM - 128 MB shared video
145 GB hard disk

XP does not have the tools to write to DVD disks. To use a DVD as a giant floppy disk you need 3rd party packet writing software installed. I'm not familiar with Nero Express but I thought the packet writing

Re: "Windows encountered problem" write data to DVD
component of Nero was InCD.
