### Run Missing From Start Menu

If you are using a stand alone computer...

Pressing the Windows key + the R key will open Run.

With the XP Start Menu...

Right click the Start button | Properties |  
Start Menu tab | Customize button |  
Advanced tab | Scroll down and check:  
Run command | Click OK | Click Apply | Click OK

With the Classic Start Menu...

Right click the Start button | Properties |  
Start Menu tab | Customize button |  
Check: Display Run | Click OK | Click Apply | Click OK

If you have XP Pro or XP Home and the above did not work...

Go here...

[http://www.kellys-korner-xp.com/xp\\_tweaks.htm](http://www.kellys-korner-xp.com/xp_tweaks.htm)

Read the instructions at the top of the page.

57. Right hand side.

Restore the Run Command

norun.reg is the file that you want.

-----

If you have XP Pro and the above did not work...

Open Group Policy...

Start | Run | Type: gpedit.msc | Click OK |

Navigate to >>

User Configuration\Administrative Templates\Start Menu and Taskbar\

Remove Run menu from Start Menu

Set to Not Configured.

### Remove Run menu from Start Menu

[[Allows you to remove the Run command from the Start menu, Internet Explorer, and Task Manager.

If you enable this setting, the following changes occur:

- (1) The Run command is removed from the Start menu.
- (2) The New Task (Run) command is removed from Task Manager.
- (3) The user will be blocked from entering the following into the Internet Explorer Address Bar:

--- A UNC path: \\<server>\<share>

--- Accessing local drives: e.g., C:

--- Accessing local folders: e.g., \temp>

Also, users with extended keyboards will no longer be able to display the Run dialog box by pressing the Application key (the key with the Windows logo) + R.

If you disable or do not configure this setting, users will be able to access the Run command in the Start menu and in Task Manager and use the Internet Explorer Address Bar.

Note: This setting affects the specified interface only. It does not prevent users from using other methods to run programs.

Note: It is a requirement for third-party applications with Windows 2000 or later certification to adhere to this setting.]]

HKEY\_LOCAL\_MACHINE\Software\Microsoft\Windows\  
CurrentVersion\Policies\Explorer  
and/or  
HKEY\_CURRENT\_USER\Software\Microsoft\Windows\  
CurrentVersion\Policies\Explorer

Value Name: NoRun

Data Type: REG\_DWORD

Value Data: 0 or 1

0 (or not in the registry) = The policy is disabled or not configured. The Run command appears.

1 = The policy is enabled. The Run command is removed.

<quote>

Description

Removes the Run command from the Start menu and removes the New Task (Run) command from Task Manager. Also, users with extended keyboards can no longer display the Run dialog box by pressing the Application key (the key with the Windows logo) + R.

This entry stores the setting of the Remove Run menu from Start Menu Group Policy. Group Policy adds this entry to the registry with a value of 1 when you enable the policy. If you disable the policy or set it to Not

Re: \*\*\* Lost RUN from the start menu \*\*\*

configured, Group Policy deletes this entry from the registry, and the system behaves as though the value is 0.

This entry affects the specified interfaces only. It does not prevent users from using other methods to run programs.

Change method

To change the value of this entry, use Group Policy. This entry corresponds to the Remove Run menu from Start Menu Group Policy (User Configuration\Administrative Templates\Start Menu & Taskbar).

<quote>

NoRun
