Ok i need serious help my computer runs windows XP and has a C drive and a D drive for some reason i can save or delete anything on my d drive and its making me crazy!!! PLEASE HELP

Nobody can help if you don't give us any information. What does "i can save or delete anything on my d drive" mean? What happens when you try? If you get an error message, please quote it verbatim.

For information on how to make a good newsgroup posting, read <http://www.dts-l.org/goodpost.htm> and <http://www.catb.org/~esr/faqs/smart-questions.html>

Maybe he needs to put a CD into his Dee Drive?

Cheers.

"Computer users around the globe recognize that the most serious threats to security exist because of inherent weaknesses in the Microsoft operating system." McAfee

"Vista is finally secure from hacking. No one is going to 'hack' the product activation and try and steal the o/s. Anyone smart enough to do so ... is also smart enough not to want to bother." philo
