Not that I'm aware of, though that would depend on your motherboard. I've never seen an application to modify the boot settings in the BIOS from within Windows, however I've never looked for one either. :)

Thanks for your reply Joe. It does boot up fine when I install Norton Ghost 10.0 emergency boot disk. I have never been prompted to press F12 but I have gone to the setup screen. Next time I boot and still have the same issue I will go to the setup instead to see if I am booting from the network.

Is there anything I can do once I'm up and connected?

Thanks and Regards,

Andy

Does the computer boot fine if you press F1?

Broadcom is a large manufacturer of ethernet adapter chipsets, commonly used in PCs by Dell and other manufacturers.

It looks like your PC is set to try to boot from the network before booting from the hard disk. You can change this by entering the setup when your PC turns on (there should be some sort of notification onscreen to press F12 or something to enter Setup).

I receive the following message when I boot up:

BROADCOM UNDI, PXE-2.1(BUILD 082) V1.0.3  
COPYRIGHT 2000-2003 BROADCOM CORP  
COPYRIGHT 1997-2000 INTEL CORP  
ALL RIGHTS RESERVED

PXE-E61: MEDIA TEST FAILURE, CHECK CABLE  
PXE-MOF: EXITING BROADCOM PXE ROM

NO BOOT DEVICE DETECTED, INSERT SYSTEM DISK  
AND PRESS F1 TO CONTINUE OR  
F2  
TO SETUP MENU.
