Dear friends,

since couple of days I accessed some of the un trusted website.. I run an antivirus.. anyway I got to remove may be by mistake or something and also heal other files..

Now I get this msg each time I startup the windows xp ...

dlhqjkd1q2.exe – Application erros :

The Application failed to inicialize – Press ok to terminate the programe..

also, directly after this error my ADSL modem "SpeedTouch" failed to configer the USB port each time I install its drivers !!!

any clue ??

.
