Well I already made a bootable BartPE CD. But this in itself
will not
restore my OS in case of a disaster (HD faulure, etc).

Why not? I've done it several times, using just this method!

How? With that Drive Copy utility? Mine doesn't work until I register it.
Or did you just copy the files over?

--
Bill

Using xcopy.exe with lots of switches under a Bert PE boot.
