Thanks Ron,  
I will try that. I am away right now and will be back on Fri.

I'm having a couple of problems:

The tab key on keyboard does not move the cursor from one window to the next. I've never seen that problem before.

Use Alt+Tab

I created some bookmarks in IE7 and then tried to drag them to desktop. I have always been able to do that, but it didn't work this time. This is a brand new computer Inspiron 1505 with XP.

Works okay on my machine. Phone Dell's tech support.

Good luck
