Nero does NOT need Windows XP's Built-In CD Burner. If you want to use Nero, uncheck Enable Recording on this Drive for your drive.

From a NERO readme...

[[Go to your Windows Explorer or My Computer and right click on your Recorders drive letter, and then go to the "Recorder" Tab and in that window disable the option for "Enable Recording on this Drive".]]

If you want to use Windows XP's Built-In CD Burner at a later time, you have to check Enable Recording on this Drive for your drive.

Enable XP's recording wizard

Open My Computer, right click the CD Drive icon and then click Properties.

Click the Recording tab.

Check: Enable CD recording on this drive

Click: Apply

Click: OK

Enable CD recording on this drive

This setting turns on the built-in CD recording features included with Windows XP.

Third-party CD/DVD burning programs sometimes disable this setting.

You can only enable CD recording for one device at a time.

Only One CD-R or CD-RW Disk Drive Can Be Used to Create Compact Discs in Windows XP

larry jordan <lcj84tbird@xxxxxxxxxxxx> hunted and pecked:

Hello

Below is instructions i got to turn off my built-in CD Burner , if i do this will it have any effect whatsoever on my Nero 5 burner that i have installed?

Thanks Much
larry

Turning Off the Built-In CD Burner

Added 1/15/02

If you want to turn off the ability to using the built-in CD burner software that comes with WindowsXP:

Open up the Explorer
Right click on the drive that is your CD burner
Select Properties
Click on the Recording tab
Uncheck Enable CD recording on this drive
