| While your protests are noted, just what was the compelling reason  
| for going to Microsoft or Windows Updates, finding an update to WMP  
| 10 and then deciding to proceed to update? Was there something wrong  
| with WMP 9 that came with Windows XP? Or were the enhancements to  
| WMP 10.X and WMP 11 just that tempting, specifically related to DRM,  
| copyright protection, piracy, etc.? IMO, WMP 9, out-of-the-box, is  
| just fine.

Windows XP came with a version 8 of WMP.

mae

Probably referring to Windows XP-SP2, which included WMP 9.0.
