On 5/23/2007 11:23 AM On a whim, golfing grandpa pounded out on the keyboard

I had a tech try to restore my computer and he restored back to 2004. How do I get my all my information back till the present?

Did that "tech" make a backup first (they should have), or do you have one (you should have)? Depending on how they "restored" your system, the data may be gone.
