Unless you can elaborate more on the history and what fix you ran follow the prior information for removal, cleanup and reinstall.

Ensure that the Windows firewall is activated during the install.

: I do use Spybot. I'm not sure what Live Update elements were loaded but I did  
: have problems running Live Update and had to go to their Web site to run a  
: fix.

:> Was this computer ever infected with a virus(e.g. Smithfraud) ?

:>

:> Was Ad-Aware or Spybot, Crap Cleaner, Easy Cleaner or similar utilized to remove any registry entries ?

:>

:> Can you recall what type of Live Update was installed ?(Program, virus definitions, trusted applications,  
internet worm protection signatures, Symevnt, Protection Center, Security software or shared components ?

:>

:> NIS protects the whole machine as long as Autoprotect is loaded. If it is not loaded in each profile, then it  
should be removed via add remove, use the Symantec removal utility for your NIS2006, restarted and  
reinstalled in an administrator profile.
