I'm burning a lot of worthless CDs trying to make one to boot to DOS (no floppy drive available).

I've downloaded several programs to boot to DOS, unzipped them, and burned the iso to a CD. When I boot to the CD I get the Hardware Profile

ISOs cant be burned the same way as regular data. The easiest app. I've found to do so is:

<http://www.bootdisk.com/plan10/burncdcc.zip>
