Use shorter names. The names wrap at some certain point and a max of two lines show. (Actually, the logic is a bit more complicated than that.) I know of no way to make the lines wrap longer than they do, or to show more than two lines.

Hello,

On my Windows XP desktop the names below the icons are too short, about 10 characters long. To see the whole icon name I have to click on the icon. How do I make the names fully visible, able to see the whole file name, on the desktop?

Thanks,
gmr2468
