Whenever I reboot my computer year changes itself to 2005 instead 2007
what
creates many security problems with my computer. I do have Windows XP
genuine
but something is very wrong with my computer.

Very often that means the first step is to replace your cmos battery.

Note that in the part of his message you snipped, he said "I have to emphasise that time is always correct and month is Ok but year is always back." That makes it virtually impossible that the problem is the battery.
