Thanks...its "An error has occurred in the DCM chain. Install the program again" I did, twice, but it doesn't help. Its ZoomText, and when I click on ZT Updates, the browser message is "All Updates are on your computer." Grrrr So, it will not operate. It did fine even with my faulty XP Pro.

Does any one know what a "DCM error" is?

A quick google gives:

You could have done the same.
