Hello everyone...I need today your help.  
one of my computer appear with a System alert message by the clock, asking to click the window to download an antivirus and antispyware solution... is a question mark in blue and change to a x in red.... I understand is a virus and i try to use Kaspersky to deleted from my computer without any result... Please I need your advise..I really dont want to reinstall the os

Thanks

This is not the place to ask questions about spyware. Please see:

<http://en.wikipedia.org/wiki/Spyware>

Find the newsgroup for spybot or hijack this. They are very knowledgeable.

Yes, it is perfectly OK for posters to ask questions about spyware here. There are many regular helpers posting here who are highly skilled in this area of computing.

The OP has gotten the correct answer and has solved his issue.

Malke
