Hi all

Is it possible to set a particular folder, _and all it's subfolders_, to a particular view?

I want to set _all_ my *Audiobooks* folders to *Details*, showing Filenames, Size and Duration.

I know how to do this for individual folders, but not how to set achieve the above.

I don't wish to affect any other folders other than *Audiobooks*.
(Keep *Photos* as *Thumbnails* for example...)

(Using WinXP Pro.)

Cheers
