Can anyone suggest a method or specific software that I can sue to force a reboot at a sopecific time each day? The BIOS setup in my Dell Dimension E310 does not offer that option.

TIA. --Alf

Rebooting your machine is a Windows function, not a BIOS function. Use the Windows Task Scheduler to schedule this \ batch file at the desired time:

```
@echo off  
shutdown -r -f -t 600 -c "This PC is shutting down in 10 minutes"
```
