You would do better to post to one of the Vista groups as your question is about Vista, not XP.
If your sure it's possible why are you asking?
Visit ATI's website to see if Vista drivers are available for it.

I am running a Dell Dimension 2400 with these items in it:

Intel (R) Pentuim 4-class processor 2.20 GHz (x86)
Diamond S9250 256 DDR: ATI Radeon 9250 Pro Video Card
1.25 GB RAM
CD Drive (Soon to replace with a DVD Drive)
CD R-RW Drive

I know I can run Windows Vista with the processor in my computer, the 1.25 GB RAM, and a DVD Drive (soon to get). But will I be able to use my Video Card on Windows Vista? I am sure its possible. No Dout.
