Dear Morgan

Thanks for your immediate response.

I manage the domain controller as well, as far as I know we never applied any policy for user at IE.

However I have one more observation, hope that will help you to get some more idea.

When I logon as administrator (administrator on local computer) to the same XP machine where I have problem. I opened the IE and saved the Proxy user account and password. I noticed it got saved.

When I logon using domain user account (please note this domain user does not belongs to admin group in local computer), in this case password never get saved.

Hope this gives better idea now, kindly help me to solve this mystery please.

Regards
Rayees

Dear Rayees,

Thanks for posting here.

This is Morgan from Microsoft. I am glad to work with you on "Password never gets saved in IE7.0 in Win XP Pro" issue.

From your description, I suspect it's most probably related to the permission of your user account. Because this Windows XP profession has

Re: Password never gets saved in IE7.0 in Win XP Pro

added into a domain, it will be controlled by Group Policy that the network administrator designated on Domain Controller. Please make sure Group Policies defined by administrator allow you to perform this task.

Because IE6.0 and IE7.0 have different behaviors on blocking user inputting. That is why you observed the pop-up password option on IE7.0.

For the further troubleshooting, could you please log on another computer with your user account to do the same tasks and let me know the result?

I look forward to your result.

Have a nice day!

Sincerely
Morgan Che

--->Hi all

Re: Password never gets saved in IE7.0 in Win XP Pro

---->

---->I have a peculiar problem. I tried all option but that doesn't seems to be

---->working.

---->

---->Problem:

---->-----

---->

---->I have Windows XP proffession PC connected to a domain. I use internet

---->through a proxy server, hence I use separate password for my Internet.

I

---->was using IE 6.0, in that I saved my password for proxy, so it never bothers

---->me to type the password always. Now I upgraded my Internet explorer 6 to IE

---->7.0. After the upgradation, I noticed the password option pops up. I

---->entered the password and clicked on a button "Save password" . Inspite of

---->this password screen pops up always.

---->

---->What will the problem? Is there any settings available to correct this!!

---->

---->Please help.

---->

---->Regards

---->Rayees
