This is what it says word for word: Warning! Potential Spyware Operation!  
Your computer is making unauthorized copies of your system and Internet files. Run full scan now to prevent any unauthorized access to your files!  
Click yes to download spyware remover!  
First off, they can't even spell right. It gives a yes or no button to click on, I click no, but it doesn't take no for an answer.  
Thanks

Then click on Programs Tab and click Manage Add-Ons and Disable all non Verified Add-Ons (You should Renable them later one-by-one and see the culprit and update it or remove it.
