I dunno, I once ordered a pizza by fax. It did come back a little flat, though.

Before others in this newsgroup have at you, you mean you downloaded SP3 and THEN
burned it to a CD?

I just downloaded the SP3 CD. I noted that on the first menu page it has a
link "What to know before installing Service Pack 3". This opens an IE
window to local CD file FAQ.HTM which is for SP2.
