Bear / Kelly

Do they alter the Registry or prevent alterations to the Registry?

PA Bear [MS MVP] wrote:

Any "protections" enabled by applications that alter the Registry (e.g., Spybot Tea Timer; NAV & Norton Add-ons).

Kelly wrote:

Doesn't undo what changes, Bear?

Safe Mode doesn't undo changes made to the Registry, though.

Frank Saunders MS-MVP IE,OE/WM wrote:

If you do it in Safe Mode none of those are running.

Re: Display Settings

Bear

Is the solution to go Offline. Disable the security software. Make the change clicking on Apply and OK. Restart the computer. Re-enable the security software.
