OK before I used to turn on my laptop and would boot right into Windows. Now I get the Welcome Srceen or logon box depending on the settings. In Control Panel/User Accounts/Change the way a user logs on or off. I've unchecked the Use the Welcome Screen as well as the Use Fast User Switching. Doesn't matter what is unchecked or checked I can't get by this. What happened and how can I boot right into windows with no logon or welcome screen. Thanks.
