I tried freeware and never really found anything that would compare with Acronis True Image. I totally agree with John's recommendation for it.

I just cloned a Western Digital 250GB HD with Acronis and it was easy, fast, but most important accurate.

Last month I try to clone Dell Inspiron E1505 60 GB Hard Disk to 120 GB Hard Disk, and I learn Dell HD unable to clone because my 120 GB turn into 60 GB Hard Disk.

You mean turned into a 60 GB partition, with all the other space (60 GB) being unallocated.
