Under DESKTOP\My Documents...

I have many folders.

The "My Pictures" folder which has many folders and filed beneath it does NOT give me the option to change the icon; in other words, the 'customize' tab under properties in "My Pictures" is NOT there!

Can anyone assist me in changing the appearance of this 1 icon?

Thanks,

FLKulchar

=====  
The evaluation version of the following utility worked for me:

Icon Software – IconChanger 3.8

[http://www.shelllabs.com/icon\\_software.htm](http://www.shelllabs.com/icon_software.htm)

Info from the site:

The evaluation version of IconChanger can change no more than 3 icons and is limited to finding a maximum of 3000 icons, however, with the registered version of this software you can change and find an unlimited number of icons
