Hi,

Boot from the XP CD and perform a repair installation of XP.

Peter

I got a new motherboard today with a new p4 in it. I had xp pro installed from before. it boots up perfectly and gets to the login screen. my usb wireless keyboard doesnt work at all (microsoft wireless) and my PS2 keyboard ALSO DOES NOT RESPOND. i used the ps2 keyboard to config the bios and it worked there. windows boots up in safe mode and or regular and no matter what i cannot type 1 key. hitting numlock also does nothing

WHAT IS GOING ON!!!
