ok I have found the deviec. In device manager, under Disk Drives it is showing as SanDisk SDFB-256 when I plug it in. But I still can't find it when I look in "My Computer". only thing showing up in that window is C: drive which is the main drive. nothing else. How do I find the SanDisk? The device manager says its working properly. you will have to spell it out to me b'cousse I'm not good at finding stuff on this computer.
