Are you removing the CD or pressing "any key" to continue booting from the hard drive?

| Thanks for the quick response,

| Been there, done that (more than once). Seems to go
| through the process okay ie files etc seem to transfer
| okay. The next screen says Windows restarting..... or
| windows in now restarting..... I can not remember
| exactly I am currently at work. I think the next screen
| should be the screen that gives you the expected time for
| the install etc and has the green flashing boxes in the
| bottom right. It never gets this far and reboots the
| system,

| Thanks in advance
