Hi,

I am trying to fix a HD and I get a panel with a messaeh that metions this..

"Disc could not ne repaired as it is being used bu another application.  
Close app and make sure no windows are open".

I have Explore on 'My Computer' so the drive isn't shown, Took of  
Nortons Auto" Email stuff and as far as I know there is no apps going to  
the drive.

How do I find what is attached to this drive. I can't see anything  
obvious in Task Mgr.

I do have the box connected to a Home Network.

Thanks

Rock
