Hi

I am using XP Pro SP2
I have a Laptop with a 40G Hard Drive and want to change to a 80G,
I want to copy all of the files and programs onto the new Hard Drive
without
reinstalling any of the programs, except for the operating system, if I
have
to.

Is there some way I can do this?

regards

If I was doing the same to my Compaq laptop I would use Ghost 2003 and
create an image to CD/DVD's or an external USB hard drive. Then change
the Hard Drive and restore the image.

Great, thanks for your help, I have Nortons Ghost, so that is what I will
do.

regards

Daniel
