Yes I have the manual and I have downloaded other info. from the HP web site. NOTHING ever talks about BIOS.

On 2008-03-13, Ritter 197 hit the keyboard and wrote:

I want to get to the BIOS on my HP Pavillion Desktop a1610n with Athlon

64X2 4200+, socket AM2, chipset GEForce 6150LE with ASUS MB
name:A8M2N-LA,
HP Motherboard name: NodusM3-GL8E.

Hitting F1 during startup gets me to a number of things, but not the CMOS /
BIOS.Same with F2 or DEL or ESC.

I am running WindowsXP, SP2 installed. All drivers are up to date.

Any ideas ?

Ever tried to locate a "Manual" for this PC? Did it not come with
one? No CD-ROM with information? I ask because each and every PC I
owed, and some motherboard I bought to replace the originals came
with those type of information.
