Ahh, added information that wasn't present in your original post, 2 routers.  
Is the Netgear router setup as a switch

The netgear has had its check box for 'Use Router As DHCP Server' unticked, therefore its not going to be a DHCP Server.

and it receives its IP from the D-Link?

Yes

Can the D-Link router  
and connected machines be pinged from the Netgear router  
and/or machine connected to it?

The dlink and Netgear can be pinged from the PC connected to the Netgear.

The dlink but not the Netgear can be pinged from the PC connected to it the Dlink

You mentioned being able to ping the printers IP.  
Can it be pinged from the D-Link router and/or all of the machines connected to it?  
Can the Netgear router be pinged from the D-Link router and/or all of the machines connected to it?

Re: How do I network my Epson Laser, I am pulling hair out ??

How do you ping from a router ??

All Pc's can connect to the internet OK.
