Hi S\_Peel,

You can scan your system to look for malware that might be affecting IE.

Try downloading, installing and updating the spyware removers from the links below. Run both of them.

Ad-aware

<http://www.lavasoftusa.com/support/download/>

Spybot S&D

<http://www.safer-networking.org/index.php?lang=en&page=download>

Hope this helps.

> *Ok, I have the same problem, I regularly empty cache and the cookies that I don't want. IE still freeze's as it did before. ANy other suggestions?? I know that without sitting at this computer it would be hard to know what else maybe effecting IE. Any suggestions would be helpful. I also run Window Washer to help clean up my system too.*
