I HAVE A DELL DIMENSION 4600C WITH 2.73 GHZ/2.73 GHz/512MB, I did not set my computer up when we first rec'd it, so here's my question: I do I find out if there is anti-virus software loaded in the system? I looked in my prgram list and did not see anthing pertaining to that type of program. Everytime I try to call dell, I'm on hold forever. Can anyone walk me through the steps to find out where it is? I'm new at this and to be quite frank. I feel so stupid because I do not understand all the different terms, ie; software,hardware,memory,etc. (get the picture?) I sure would appreciate it if anyone out there can assist me. Thanks,Jane
