There is a registry edit that I know of that will hide the Screen Saver Tab.

Start > Run > Regedit

Navigate to

HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Policies\System

If there is a DWord Value called "NoDispScrSavPage" with a data value of 1 this will disable the screen saver tab. Change the value to 0 or delete it to see the tab again.

The above can also be changed via group policy.
