Hi,

I'm a (fully UpDated) WinXP Pro 2002 sp2 user.

When I try to use the 'Server Extensions' Administration program: FpMmc.Msc

I get an error messages telling me:

'The server administration programs and the server extensions on the web server are not compatible. The administration program is too old to use with this server.'

I can find no updates or anything else pertaining to this problem)< :

Thanks for any assistance anyone is able to give me with this problem (< :

ps Is there anyway to specify the folder location other than C:\inetpub\wwwroot\ that FpMmc.Msc administers to ?
