In Internet Explorer –

1. Tools > Internet Options > Advanced
 2. Scroll down to the Security Settings.
 3. Make sure that the two boxes are checked that say "Enable SSL 2" or "Enable SSL 3".
- Try your secure sites.

Another thing you can try is:

Go to start/run

Type in: regsvr32 softpub.dll

Press Enter or click OK

How to troubleshoot problems accessing secure Web pages with IE6 SP2
After you upgrade to Microsoft Internet Explorer 6.0 Service Pack 2 (SP2) in Microsoft Windows XP SP2, some SSL-secured (128-Bit) Web pages and Web sites may not work correctly. Frequently, this behavior is caused by security changes in Windows XP SP2.
