Don't know where else to go!

I just installed Microsoft DigitalPersona Password Manager & MS Fingerprint reader on my XP Pro machine. It is NEAT!!!

However, in the learning process, I set up "Logons" to a variety of Web sites that I now want to delete and/or modify in "Quick Links". I've read the "Getting Started" manual and still can't figure out how to either modify or delete selected "Logons". Can anyone either direct me to a source for this or, even better, provide simple instructions that even an idiot can use.

Thank you,

Ron
