Neelam

What version of Windows is installed?

How large is your hard disk and how much free space? In Windows Explorer place the cursor on your C drive, right click and select Properties to get this information. Is the hard drive partitioned?

The error message 0xc0000142 indicates a problem starting an application (programme). What application or applications are generating this error?

Are you checking for spyware? If not installed download Adaware and / or update Reference file from <http://www.lavasoftusa.com/support/download/> and use it to remove parasites.

--

Hope this helps.

Gerry
