Upgraded Sony Vaio from ME to XP a few years ago, Trying to now play DVDs and DVD icon just blinks several times when loading DVD drive. Tried trouble shooter and knowledge bases which said I needed compatible DVD decoder. Downloaded InterVideo XPACK and Windows Media Player still does not recognize DVD in DVD player. Media player recognizes and plays audio CDs. Sony will not support XP upgrade and can't find driver for Pioneer DVD player on website. I'm ready to give up!!!
