To repair all system files, go to Start/Run, and type (or paste in): SFC /SCANNOW (see: Description of Windows XP and Windows Server 2003 System File Checker (Sfc.exe): <http://support.microsoft.com/default.aspx?scid=kb:en-us:310747>)

Re: Create A File Association

>>>I used to be able to type a web address in the run box and it would open ie and go to that site but now I get the response This

>>>file does not have a program associated with it. Create an association in the folders options control panel.

>>>

>>> I have looked at the folder options but I am not sure which one of the many folder types I need to ammend, I tried resetting

>>> everything but it didn't work. The help files weren't very helpful so if anyone could advise me I would be appreciated.

>>>

>>> Thanks in advance.
