I have virus protection, firewalls, popup blockers, a spyware remover, & a CWS shredder, but still I'm spending more time clicking off popups, deleting unwanted bookmarks from my Favorites list, & deleting unwanted shortcuts from my desktop, than working with my computer. How do you keep free from these swarms of pests?

Many of these files are attached to \WINN\system32\. If find many files attached to this but don't know what they are so don't know which to delete. Where can I get a directory of file names?

The most tenacious of these pests are Aurora, banners.searchingbooth.com, ads1.revenue.net, fad.1115.nyc1.targetnet.com, adserver.sharewareonline.com, www.smileycentral.com, ads.addynamix.com, net-offers.net, All Jackpots Online Casino, & All Shots Casino. How do you cut these off?

.
