To enable Fast User Switching, you must also enable the Use the Welcome screen option. This feature cannot be used if your computer is a member of a domain.

How To Use the Fast User Switching Feature in Windows XP:

When I go to change users in XP Home its popping up a grey box that says This computer is in use or locked. Only my user name or admin can unlock the system and then gives a User name password box. How can I get it to show the blue box with all my user icons again?
