Hi Gerry,

Internet Explorer's Index.dat

Do you have this option unchecked?

IE Options > Content tab > Auto Complete > "Use AutoComplete for" > "Web addresses."

If this option is unchecked, the URLs list won't appear in the Run dialog.

Ramesh

Mine does not list these:

– Visited web pages stored in the Internet Explorer's  
INDEX.DAT file

Which index.dat? There are 16 on my system!

It could be an Internet Explorer setting. Mine is set to  
remove Files when the browser is closed.

You seem to need to reboot to clear the entries in the  
RunMRU registry location. That's my feeling but I  
could be wrong.

—

Regards.
